

CUT 65CNC

MODERN, EFFECTIVE, INDUSTRIAL PLASMA CUTTER.

PRELIMINARY INFORMATION

SPARTUS Pro CUT65CNC. This is an inverter plasma cutter with integrated CNC control socket. Designed for cutting metals and other electrically conductive materials. It is powered with three-phase 400V source power.

DESCRIPTION

Through the use of modern technology, we have obtained excellent source for professional plasma cutting. Maximum cutting current is 65A and the maximum thickness of the material being cut equals **40mm**.

The cutter is equipped with a pressure reducer with air filter which is mounted at the rear of the casing, in a place specially designed for that purpose (protection against damage eg. during the move).

Built-in system of contactless pilot arc ignition without HF - provides excellent quality of cutting edge and longer life of consumables.

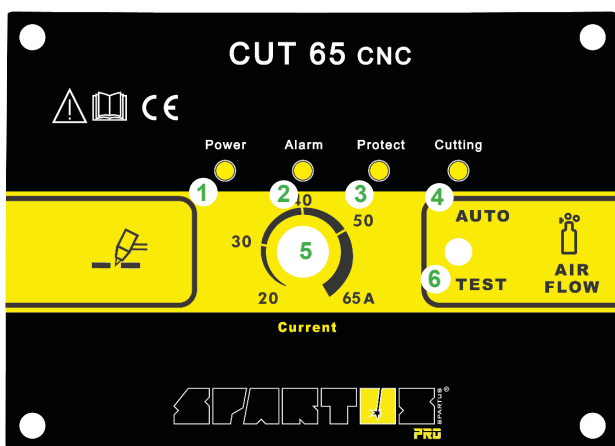

EXAMPLES OF USE

- production,
- light industry,
- CNC cutting tables.
